

## Curriculum vitae

### Introduction

Dedicated, **results-driven** leader with a strong focus on **execution and adaptability**. My expertise lies in managing high-performance teams, including remote members, utilizing Agile methodologies to deliver **quality in scalable, data-driven** products.

With experience **leading diverse** teams of over 20 members in development, design, data analytics and UX, I excel in integrating metrics, analytics, business, and technical aspects to drive **holistic and informed decision-making**.

I am known for **building and scaling development teams** that thrive in fast-paced environments, characterized by **craftsmanship**, agility and a commitment to the mission.

I seek a role where I can apply my extensive team and project management skills in a dynamic, changing environment that values a **pragmatic and results-oriented approach** to IT challenges and building successful products.

## Experience

- 15+ years of leadership / management.
- Up to 20 direct team reports
- Managing international projects and locations
- System architect and practical knowledge about implementation
- IT strategy, IT operations and sourcing

## Qualifications / Traits

- Result driven with strong focus on delivery and impact
- Dynamic, responsible and independent
- Thrives with innovation and change
- High stress threshold, and the ability to maintain focus
- All round great guy

## Employment

2019 / ----	CTO, Tonsser
2013 / 2019	CTO, Autobutler
2012 / 2013	Freelance developer, Anderki.dk
2010 / 2012	CTO, Copenhagen Shipping Exchange - CPHSE

## Background

I am a **results-driven leader** with a focus on **execution** and proven expertise in Agile methodologies like Scrum and XP. I excel in building **high-performance**, autonomous teams dedicated to **craftsmanship** and quality, and I have experience managing diverse teams of over 20 members, including developers and UX designers. My strength lies in a balanced understanding of **metrics, analytics**, and both the **business and technical** sides of products, which informs my holistic data driven decision-making approach.

I've managed projects involving **scalable cross-continent** databases, **machine learning**, data mining, and various applications. I specialize in technical leadership roles such as **CTO**, particularly in scaling operations and navigating complex IT landscapes. My career highlights include roles in both established and startup environments, where I've tackled **high-load data-driven** websites and **rapid development** cycles across multiple platforms, including iOS and Android.

I've worked with major partners like Disney and Bloomberg, which underscored the importance of **integrating IT and business strategies**. My track record includes building large-scale international portals, global big data solutions, and advanced advertising systems.

## I am looking for

A **dynamic** role where I can leverage my **management** and IT skills in a fast-paced, changing environment. I thrive in settings that blend a **rigorous work ethic** with an **informal company culture**.
